

Proponents of corporate social responsibility (csr) strongly believe in benevolence; however, they still want their businesses to be profitable. in the long run, they believe _____.

however, they still want their businesses to be profitable. In the long run, they believe "CSR can lead to even more profits".

It is generally held that corporate social responsibility (CSR) could build organization benefits and accordingly most substantial organizations are effectively occupied with it. Most officials trust that CSR can enhance benefits. They comprehend that CSR can advance regard for their organization in the commercial center which can result in higher deals, upgrade worker faithfulness and pull in better faculty to the firm. Likewise, CSR exercises concentrating on supportability issues may bring down expenses and enhance efficiencies too.

We started with two and a half ounces of a perfume mix that was 96% alcohol. We added half an ounce of a preservative, and ended with a result that was 94% alcohol. Determine what percent of the preservative was alcohol

Which equations represent the line that is parallel to $3x - 4y = 7$ and passes through the point $(-4, -2)$? Select two options. Options:

1. $y = -\frac{3}{4}x + 1$
