

Which of the followings is true about gluconeogenesis? A. One ATP and one GTP is needed to convert pyruvate to PEP B. Oxaloacetate is involved in generating PEP C. Gluconeogenesis primarily occurs in the mitochondria D. In occurs in the brain

Answer:

The answers A, B and C are correct

Explanation:

- Gluconeogenesis primarily occurs in the mitochondria mainly in the liver.

- Oxaloacetate is used to generate PEP by a two step process.

1) conversion of Pyruvate to oxaloacetate catalyzed by pyruvate carboxylase. This process requires ATP hydrolysis.

2) The decarboxylation and phosphorylation of oxaloacetate catalyzed by phosphoenolpyruvate carboxykinase (PEPCK) producing PEP. This process requires the hydrolysis of GTP.

Therefore options A, B and C are correct.

Answer:

C is your answer

Explanation:

Your school is planning a fundraising dinner. The expense for this event must not exceed \$2,475.00. The team organizing the event has calculated that the cost per adult guest will be \$18.00 and the cost per child guest will be \$9.00. The venue can hold no more than 150 guests. The question is If the event were held in a venue that can accommodate 200 guests, what is the maximum number of adults who could attend if the event fills the venue to capacity? Include a screenshot

of your revised graph with your answer. Write a system of inequalities that represents this situation.

What is the most important factor to consider if an individual expects to carry a balance on his credit card from time to time Answers are:

- A) annual fee
- B) APR
- C) late fee
- D) over-the-limit fee

... note it's not over the limit fee because I got that one wrong on my test someone help

Preventing war, promoting cooperation among nations, and helping settle disputes are goals of which organization?

A nurse is having a conversation with another nurse. Nurse A listens to Nurse B. She asks questions and repeats information from the conversation as needed.
