

**Earth attracts a person with a gravitational force of  $7.0 \times 10^2$  newtons. What is the magnitude of the force with which the individual attracts Earth? ..**

- A)  $3.0 \times 10^2$  newtons**
- B)  $7.0 \times 10^2$  newtons**
- C)  $8.5 \times 10^2$  newtons**
- D)  $9.8 \times 10^2$  newtons**

B. In the system of the object and the earth, by Newton's third law, the object will exert an equal and opposite force upon the earth.  
Answer:

B.  $7.0 \times 10^2$  newtons

Explanation:

Which statement regarding competitive advantages is true? If several competitors pursue similar differentiation tactics, they may all be perceived as equals in the mind of the consumer. With an overall cost leadership strategy, firms need not be concerned with parity on differentiation. In the long run, a business with one or more competitive advantages is probably destined to earn normal profits. Attaining multiple types of competitive advantage is a recipe for failure. True or false: the basilica of sacre Coeur is located in an area of paris that has been considered sacred for thousands of years?

What was Andrew morays role in Scottish wars of independence

If  $A = (10, 4)$  and  $B = (2, 19)$ , what is the length of  $AB$ ? O

A. 17 units

B. 12 units

C. 23 units

D. 15 units

Arrange the following five events in an order that explains the mass flow of materials in the phloem. A. Water diffuses into the sieve tubes. B. Leaf cells produce

sugar by photosynthesis.C. Solutes are actively transported into sieve tubes.D. Sugar is transported from cell to cell in the leaf.E. Sugar moves down the stem. How do the different branches of our government use these powers to pass laws and establish regulations? Are these powers abused or used properly by our government officials? Why or why not?

Natalya earns \$7.50 an hour when she works for her mom at home. On Monday, she works for  $1\frac{1}{2}$  hours grading papers. On Tuesday, she worked for  $1\frac{1}{3}$  hours entering data, and on Wednesday, she worked for  $1\frac{3}{12}$  hours organizing paperwork. How much was Natalya's total earnings in the 3 days?

The most widespread cause of species extinction is which of the following

A trader bought  $m$  apples for \$12. (a) Find an expression, in terms of  $m$ , for the cost, in cents, of each apple.

(b) It was found that 3 of the apples were bad, and could not be sold. The trader sold each remaining apple for 2 cents more than she paid for it.

Write down an expression, in terms of  $m$ , for the total sum she received from the sale of the apples.

(c) She made a profit of 96 cents from the sale of the apples.

Write down an equation to represent this information, and show that it simplifies to

(d) Solve the equation

(e) Find the selling price of each apple.

THANK YOU SO MUCH ??
