

**In Indian culture, women were expected to \_\_\_\_\_, but Colonial women were not expected to do the same thing.**

Thank you for posting your question here. I believe below are the choices that can be found elsewhere:

write poetry  
memorize stories  
care for children  
prepare meals

The answer is the second one which is memorize stories. I hope my answer helps.

Answer: memorize stories.

Explanation:

In the Indian culture, native American women were expected to memorize stories. The reason is that, as native Americans did not have the possibility to keep written records, they used the storytelling as a way of transmitting their past, culture, history and traditions from one generation to another.

One disadvantage of this type of power is that it still pollutes the air. biomass  
geothermal power  
hydropower  
solar power

You want to create a new warming appliance that is safe. Which type of electromagnetic wave would be most useful to investigate?

X-rays  
infrared waves  
gamma rays  
ultraviolet waves

When an enlightened person achieves the first stage of nirvana, that person \_\_\_\_\_. A. no longer experiences strong desires or

aversions.

B. ceases to exist altogether.

C. will come back in future lives to remove the suffering of others.

D. stops experiencing any pain or pleasure at all.

What register task requires the sales associate to inspect the item before accepting it? A. Applying a discount B. Processing a return C. Making a cash drop D.

Accepting a gift certificate

Who is Higlac and how is Beowulf related to him

Problem 5.58. Suppose  $f: X \rightarrow Y$  and  $g: Y \rightarrow Z$  are functions. If  $f$  is one-to-one, prove that  $f \circ g$  must be one-to-one. 2. Find an example where  $f \circ g$  is one-to-one, but  $f$  is not one-to-one.

What was the three-fifths compromise?

find the value of  $k$  for which the following system of equations has a unique solution. 1.  $kx + 2y = 5$ ,  $3x + y = 1$ ?

3. (3 points) Label each example as either (PI) passive or (AI) active immunity: a. \_\_\_\_\_ Bill had chicken pox when he was five. He doesn't catch it again, even when his nephew gets sick with the virus.

b. \_\_\_\_\_ Billy Jr gets vaccinated with a live attenuated form of the chicken pox virus. He doesn't get chicken pox after playing with his infected cousin.

c. \_\_\_\_\_ Bill's 3 month old daughter is breast feeding. She does not get chicken pox after playing with her infected cousin.

How do you spell there to show possession?

Factor  $-1/3$  out of  $-1/3x - 8$

The water table is the A. upper boundary of the zone of saturation.

B. zone of aeration.

C. lower boundary of the zone of saturation.

D. aquifer.

The force involved in a collision is  $1.0 \times 10^2$  newtons. The duration of the impact is  $1.0 \times 10^{-4}$  seconds. What is the value of the change in momentum?

Find the product of 2 and  $(3.7 \times 10^{-4})$

Addition and Subtraction Equations

Solve

$6 + (w - 10) = 5$ ?

A 6-column table titled The cost of and return on pie production has 7 rows. The first column is labeled pies produced per day with entries 0, 1, 2, 3, 4, 5, 6. The second column is labeled total cost with entries 0, 1, 1.50, 1.75, 2.25, 3.50, 5.00. The third column is labeled Marginal cost with entries 0, 1, 0.50, 0.25, 0.50, 1.25, 1.50. The fourth column is labeled total revenue with entries blank, 10, 20, 30, 40, 50, 60. The fifth column is labeled Marginal revenue with entries blank, 10, 10, 10, 10, 10, 10. The sixth column is labeled Profit with entries 0, 9, 18.50, 27.25, 37.75, 46.50, and 55. The chart shows the marginal cost and marginal revenue of producing apple pies. What most likely will happen if the pie maker continues to make additional pies?

The marginal costs will continue to rise, increasing the total cost, while the marginal revenue remains the same, decreasing the profit.

The marginal costs will continue to fall, decreasing the total cost, while the marginal revenue remains the same, increasing the profit.

The marginal costs will continue to rise, increasing the total cost, while the marginal revenue remains the same, increasing the profit.

The marginal costs will continue to fall, decreasing the total cost, while the marginal revenue remains the same, decreasing the profit.

Miranda and her family share a family data plan for their cell phones this month her mom used 400 her father used 350 and her little sister use three 200 minutes

they want the average number of minutes to be 350 minutes how many minutes should Miranda use

What happened during the Berlin Airlift?

$V \cdot 4x =$  How do you simplify this equation
